Committee Members,

Other than the myriad of “professionals” in the medical field who sold out their patients, families, and communities for the profits in human experimentation...

Other than politicians who continue to march right along with Big Pharma in their quest for the golden calf ..

I can't think of a least trusted group then the media who lockstep regurgitate misinformation and dare to call themselves journalists. That's the result of a media dependent on controlling forces or the government nod..... for instance.....

No. I do not want my tax dollars funding “news” sources capable of the above “reporting” in any format for that matter. Let the general public support the news format they choose with their own dollars. The Government doesn’t get to prop one up outfit over the other.

Dependence on government tax dollars does not make for independent journalism.
