House Committee On Judiciary

Measure, Appointment or Topic:

SB599

I oppose this bill. My husband was a forest engineer for his career and during that time many people were employed in the forest industry. By employing more people the state would generate more tax revenue. In the past a healthy logging industry created a lot of revenue, if you look. There were few wild fires in Oregon as well. We need to get back to a healthy logging industry in Oregon, employ people and create strong business. Taxing the industry that has already been hit by environmentalists and government for years does nothing to help Oregon. Are you here to help Oregon get better?
