Measure, Appointment or Topic: HB5006
Submitting this in supportive HB2979

Oregon is in dire need of support for food hubs and disaster resilience grants for Oregon farmers. As the means to support small business narrows, we need to create a stronger base for the what if situations. The demographic that fall into the what if continue to surge, while the support falls dangerously behind and more concerningly narrows. Given how unpredictable our next few years will look this support is more pertinent now more than ever.
