

Submitter: Diana Ackerman

On Behalf Of:

Committee: House Committee On Revenue

Measure, Appointment or Topic: HB3489

This government needs to quit taxing our people in this state. We do not need any more taxes, you need to quit spending and live within the budget that was afforded you. This tax will not help anyone, it will end up harming the people that you say you want to help. You have already let so many acres of harvestable tree burn up and won't do anything about harvesting them to make a better forest and sustainable trees for our future. With everything that you are doing, you are making us more depended on foreign source products, and the only thing you are doing there is making it more expensive for Oregonian to live day to day.

I strongly oppose this measure
