I've been driving for both Uber and Lyft for over nine years in the Portland Or. metro region. During this time, I've given over 47,000 passenger rides and nearly 4,500 deliveries. Surprisingly, the payments I received from Uber have remained largely the same since I started. However, during the pandemic, Lyft significantly reduced driver payout rates. Please see the attached document for more details. Despite these changes, Lyft continues to inaccurately pay drivers and has to adjust weekly payments to ensure drivers receive the 70% payout from the previous week. As a full-time driver, resident, homeowner, and veteran in Portland, Oregon, I strongly support this bill.

Lyft-1.
