

Submitter:

Carole Leofsky

On Behalf Of:

Committee:

Senate Committee On Education

Measure, Appointment or Topic:

HB2586

First of all, a very high percent of 'asylum' seekers are out and out fraud. People all over the world take advantage of loose laws in America to scam the asylum rule for economic gain at the cost of taxpaying America citizens. Democrats go along with this, wink, wink.

Taxpayers have to make up the difference between instate and outstate tuitions for the cost of that education. Oregon needs to look out for its citizens first. We do not owe the world for all their desires. While the national debt is not directly Oregon's debt it is part and parcel of the mental problem that America can afford everything for everybody. America and Oregon need to practice frugality in order to have long term fiscal integrity. We don't have that in Oregon or the US at present. It's a free for all to grab our resources and squander them on everybody and every thing. Muster up some intestinal fortitude and learn to say NO!

No instate tuition for the so-called asylum seekers, illegal aliens and/or foreign gang bangers either.
