

Submitter: John Kilkenny

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3874

I believe that permitting the mid sized wind farm at the County level is a positive. Local residents better understand the specific issues and impacts associated with the siting of the wind farm. It is more difficult for people at the state level to be familiar with the landscape and number of people living close by, and the characteristics of the land. I think local planning can make quicker and better informed decisions.
