

Submitter:	Michael McQueen
On Behalf Of:	McQueen Properties Sweet Home
Committee:	House Committee On Revenue
Measure, Appointment or Topic:	HB3489

As a long term 150 plus year family property, we must stop additional taxes being levied on harvests that occur only once every 10 to 40 years. The profit margin is already minimal in most cases and the administrative help that is provided by the programs that will no longer be accepted is key to a small operation. All of these information reference points are particularly critical as subsequent generations struggle to retain the knowledge base or relearn how to best manage the forestry assets. Please vote no on this bill to help us maintain our small plot family owned viability.
