

Submitter: Shelby Schuppe

On Behalf Of:

Committee: Senate Committee On Early Childhood and Behavioral Health

Measure, Appointment or Topic: HB2387

Dear Senate Committee on Early Childhood and Behavioral Health:

As someone who has dealt with mental health issues and is constantly researching navigating mental illness and resources, I support this step in the right direction to making another resource and another service accessible to people who need it.

While I haven't utilized psilocybin for my mental health, knowing that it is a resource I can access if/when needed gives me comfort. I can access resources that allow me to be my best self, and everyone should have easier access to the plethora of healthcare services.

Thank you.
