Care

Measure, Appointment or Topic: SB951

I support this bill. Doctors should be able to develop care plans with their patients without having to worry about corporate influence. The voiding of non-compete/non-disparagement and preventing retaliation against medical professionals helps keep patients and medical providers safe. Additionally, corporate entities whose higher-ups have no experience in medical care have no right and are in no position to tell a medically trained person how best to care for their patients.
