Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB3489

We already have to pay a severance tax. And when the timber goes into notification, we have to start paying an estimated tax.

Quit trying to cover up legislators ineptness by stealing more of our money through taxes.

Timber is a crop and State Forests such as the Elliott should be managed and harvested responsibly. Something that is totally beyond the abilities of our leadership. Increase the sustainable harvest of trees and the tax money will come in without increasing the tax rate.
