

Submitter: cynthia mahoney  
On Behalf Of:  
Committee: House Committee On Behavioral Health and Health Care  
Measure, Appointment or Topic: SB295

I oppose this measure.

As a retired medical provider and forensic researcher, I can tell you that corona viruses and rhinoviruses are considered to be constantly mutating versions of THE COMMON COLD. Of course, there were quite a few issues surrounding coronavirus 19, specifically financial and political. It became a hotbed of hatred. This measure simply puts the stench of onus upon pharmacists.

Whether a person wants to accept an ever mutating virus vaccine is their prerogative (of course they'll be bubble boys and girls rolling around cities everywhere if you have any idea what I'm referring to). Those will be the human versions of the aliens in The War of the Worlds. They will also become chronic carriers of RSV (since the adult vax is out...smh) and coronavirus.

Stop the nonsense.

Do NOT allow our NIH to use any version of any virus or bacteria for "gain of function."

By the time ppl have had their vaccine 7 or 8 times, they've worsened their cardiac function

There is NO reason to make this measure into permanent law because as you know ... whatever is made permanent is almost always permanent.
