

Submitter: Judy Schilling

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: SB951

I fully support SB 951, having experienced the denial of services by insurance companies throughout my life. Service decisions should be made only by medical professionals without regard for cost. Now that I am on traditional Medicare I feel so much more secure knowing that whatever my doctor feels I need is now attainable. Too many medical decisions are being made by those who seek profit, not health care.
