

Submitter:	AE Stone
On Behalf Of:	My retirement
Committee:	House Committee On Revenue
Measure, Appointment or Topic:	HB3489

I support this because it makes more sense than whatever we are doing now.  
Our roads suck and before 1990 we paved every darn backwoods dusty trail.  
Now we just build bridges to nowhere for log trucks for global timber profits and our  
County Commissioners take dark money and get drunk.  
We need a HUGE tax on the global timber industry to make reparations for the  
damage they have caused to generations of children that are now herbacode infected  
gonads and lungs.  
The loss of intellect by raising children to become "Logger" "Swat" and "Firefighter"  
Instead of "wizard" "teacher" and "scientist"  
There are not really any dreams here in southwest Oregon.  
It is the Africa of the west coast.  
Keeping people stupid and hungry is what the global timber CEOs want.  
They LOVE stupid people.  
I say let's not give them so much to love.  
Those CEOs and the Huge industry can afford to give Oregon at LEAST the same  
Harvest tax that they give Idaho and Washington and California

I SUPPORT this bill.
