

Submitter: Debbie Newhouse

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: SB951

The influence of money and corporations in the medical field is extremely scary. I have seen what private equity firms that buy businesses do, I cannot imagine what they would do to medical care. Everything becomes about money and although we need good money management some decisions need to be based upon humanity and long term improvements not just short term financial gains. Please do not let a corporate mentality take over our healthcare and compassion for others.
