

Submitter: Michael Mitchell

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: SB951

I have often wished that health professionals attending me thought less about the needs of my insurance company and more about the needs of patients, I think health insurance companies ensure the health of their stock and quarterly profits at the expense of the health of their insured. With their A.I. driven denial procedures, they've left no room for doubt regarding whose interest they are protecting and would protect if given even more say in health care decisions.
