

Submitter: Shelby Schuppe

On Behalf Of:

Committee: Senate Committee On Education

Measure, Appointment or Topic: HB3007

Dear Senate Committee on Education:

I'm writing in support of this bill as we learn more about brain injuries and concussions. It is becoming increasingly necessary to provide these types of services and supports within the schools directly. Students frequently experience traumatic brain injuries and concussions that go unnoticed. This type of bill provides a foundation for greater support and attention for students experiencing these types of disabilities that can be quite challenging as they are learning at the same time.

Thank you.
