

Submitter: Stephen Hocker

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: SB951

Dear Oregon Legislature / House Committee on Behavioral Health & Health Care- I hereby submit testimony in Support of Senate Bill SB 951. As a 35 year resident of Oregon and a Senior citizen that utilizes various Doctor's, Nurses, Cardiologist's and Endoscopy Surgeons, it is very important to me that the decisions about my necessary, proper and beneficial medical care come directly from the Doctor's, Nurses and certified medical care professionals that observe and treat me for continued good health. I do not want those critical decisions in the hands of medically untrained business management services employees who do not have the expertise or medical certifications to make informed medical care decisions, diagnosis of conditions, or recommendations of subsequent medical care for myself or my family members as well. Thank you, the Hocker Family; Steve, Elliot, Noah & Nathan Hocker.
