

Submitter: Phyllis Webb

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: SB951

I am in full support of the passage of this bill. We do not need corporations managing our medical care, driving up patient care cost, making it hard for physicians to practice without corporate intervention. This revision of our current OCPM will ensure that physicians maintain autonomy in their practices and Oregonians receive access to high-quality care. Just like we don't need the government controlling abortion. We also need to be able to choose our doctor.
