

Submitter: Eleanora Kleim

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: SB951

SB 951 seeks to ensure that physicians are the ones who make the medical care decisions for their patients without pressure for corporate profits. I want to trust that my doctors will make the best recommendations for medical care for me and my family. Keeping corporations from owning medical practices, practicing medicine or employing physicians will help ensure physician independence and autonomy to provide the best medical care for their patients. I support SB 951.
