RE: LETTER OF SUPPORT FOR UNIVERSITY OF OREGON BOND REQUEST OF \$53.25 MILLION TO CONSTRUCT A CHILD BEHAVIORAL HEALTH BUILDING TO EXPAND OREGON'S BEHAVIORAL HEALTH WORKFORCE

Dear Honorable Co-Chairs Lieber and Sanchez,

On behalf of the Northwest Portland Area Indian Health Board, I write in staunch support of the University of Oregon's request for \$53.25 million in state bonding to construct a Child Behavioral Health Building to expand access to care and strengthen Oregon's behavioral health workforce.

Oregon ranks 49th nationally in Mental Health America's 2024 Youth Ranking, reflecting both the high rates of behavioral health challenges among adolescents and the limited availability of timely, effective care. These challenges affect children and families in both rural and urban communities across the state.

Reversing this trend requires strategic investment in both behavioral health service delivery and the education and training infrastructure needed to expand the workforce. The Child Behavioral Health Building is uniquely positioned to address both.

This 54,000-square-foot facility on the UO Portland campus will:

- Expand access to free, evidence-based behavioral health services for youth and families.
- Reach rural and underserved communities through a new telehealth center.
- Train a diverse new workforce of behavioral health professionals equipped to serve in schools, clinics, and community settings.
- Support research and innovation to improve outcomes and strengthen care systems across the state.

By combining clinical services, workforce training, and applied research, the facility supports a comprehensive approach to addressing Oregon's youth behavioral health needs.

The building will house the Ballmer Institute for Children's Behavioral Health, which offers a first-of-its-kind undergraduate program focused on preparing students to identify and address behavioral health challenges early, and the Prevention Science Institute, which conducts research to develop effective behavioral health interventions and partners with schools and communities to put them into practice. Bringing these two institutes together under one roof will align workforce preparation with applied research and service delivery, strengthening the pipeline from classroom to care and expanding support for children and families across Oregon.

The Northwest Portland Area Indian Health Board has a strong Behavioral Health Program, providing support to the forty-three federally recognized Tribes we serve in the northwest. We are committed to providing technical assistance and implementing curriculum as it pertains to early childhood mental health

and well-being of our Native youth. We have dedicated staff who are a part of the Children's Behavioral Health Micro Credential program offered through the Ballmer Institute.

We respectfully urge you to prioritize funding for this high-impact, forward-looking investment in children, families, and the state's behavioral health infrastructure. Oregon's youth deserve access to the care they need, and this project will help ensure they receive it.

Sincerely,

A handwritten signature in black ink, appearing to read "Laura Platero". The signature is fluid and cursive, with the first name "Laura" being more prominent than the last name "Platero".

Laura Platero, JD
