

Submitter: Deborah Carey
On Behalf Of: HB 3653
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: HB3653

On the cusp of an AI revolution , and with Cryptocurrency booming, our demand for electricity will grow exponentially. Please consider us ratepayers who have very modest demand and support this measure to make them pay their fair share! We cannot subsidize this huge undertaking. It is unfair and unjust. Thank you.
