HB3838

The care home industry is extremely unique. The compensation models of small care homes do not align with standard businesses. Most businesses do not have employees ie. resident managers or caretakers living at their place of business.

The factors implemented by passage of this bill will only serve to restrict the number of residential care homes in Oregon and isolate care to only the largest of facilities (ie Big Business) thereby doing away with Oregon's model of small residential facilities and sacrificing the care experience of Oregon's most vulnerable residents.

As a state that cares about its seniors and its small businesses I am shocked this bill is even being considered.

I strongly oppose this bill.
