Committee: House Committee On Behavioral Health and Health  
Care

Measure, Appointment or  
Topic: SB951

I am an RN and I love that this bill supports physicians and other medical providers in making decisions for their own patients. We want to protect the physician-patient relationship and make this the centerpiece of medical care. And physicians should not be forced into situations/agreements/contracts that reduce their decision making capacity or would discourage them from speaking up in any way about safety concerns. This bill helps to keep corporate interests away from the physician-patient relationship.
