

Submitter:

Pamela Ezell

On Behalf Of:

Committee:

House Committee On Education

Measure, Appointment or Topic:

SB1098

Books presented to our children should ALWAYS be scrutinized and parents should be supportive. If parents are not supportive or question the content of books they should be removed from curriculum until reasonable study and agreement can be reached. Math doesn't have problems with books, history, might not even have problems with books. Teaching fringe opinions should ALWAYS be a problem.
