

Submitter: Amy Bullock

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or Topic: HB3932

Beavers are Oregon's state animal for good reason. As ecosystem engineers, they not only create habitat that improves biodiversity, but also makes ecosystems more healthy, resilient and productive. They improve an ecosystem's protection against wildfires, which we all know are becoming more widespread and destructive due to climate change. I urge lawmakers to support HB3932 to not only protect our state's environment, but also our valuable natural resources.

Thank you,

-Amy Bullock
