

Submitter:	Ann Jamison
On Behalf Of:	Beaverworks
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

Beavers are essential to the repair and rehabilitation of Oregon waterways. Many of the key waterways have been damaged to the extent that they are no longer healthy environments for the fish, wildlife and humans that need them for life. As a keystone species, beavers have the ability to occupy these waterways and “engineer” them back to health at no cost. This bill is critical follow-up to the beaver believer bill passed last year advancing the objectives of that legislation. Please support and pass this essential measure to improve naturally critical waterways in Oregon.

Thank you,  
Ann Jamison
