

Submitter: Robb Sturtzman

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or
Topic: HB3932

Beavers are crucial to supporting healthy and fertile environment that ultimately helps supports the health of humans too. They act as bioengineers transforming the landscape in countless ways that help support biodiversity, nutrient distribution, and even toxin capture just to name a few. We must do everything in our power to aid these diligent little creatures to preserve our wild ecosystems.
