

Submitter: Stacey Holeman

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3546

The pressure on our energy systems by very large energy users is driving up costs for everyone. This increase is disproportionately and unfairly hitting families. Big users like data centers and cryptocurrency shops need to pay their fair share. This bill will

- Create a new customer class for data centers and cryptocurrency shops starting at 20MW customers
- Protect families and small businesses from costs when bringing these new large energy users online
- Prevent risk for families and small businesses from paying for the costs of these large energy users

It's the right thing to do! Please support HB 3546.
