

Submitter: Sue Craig

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: SB726

For the future of our planet....actually for humans living on our Earth, please pass this bill. We must stop heating up our environment, and the methane we produce heats us up considerably! We must capture methane from our trash/grabage depositories, to stop putting methane into our atmosphere.

Thanks for all your efforts for the people of our state...and of our earth.
