

Submitter:	Jim Harrison
On Behalf Of:	
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

Please advance this legislation and improve Oregon's native habitats. Beavers were historically widespread throughout Oregon and as key "engineers" created wetlands habitat even in drier areas for the benefit of many other species including humans through fire and flood protection, improved annualized stream flows, broader and better balanced species diversity and even simply for scenic value. This legislation, if signed into law, is one small step at protecting beavers while they do beneficial work for all of us.
