

Submitter: Michael Sears

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: SB1098

Greetings:

Our opposition to this bill stems from the fact that our State leadership insists on upholding D. E. I. based program that discriminates against portions of our population and sensors against the desires of Faith based organizations and citizens.

Our school and county libraries insist on presenting sexually explicit material to our young children. Parents and the community should have the local power to determine these issues.

I request a NO vote for this bill.

Michael Sears
