

Submitter: Marianna Iverson

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or Topic: HB3932

I am writing in support of HB 3932 - We need to save Oregon's beavers. They are powerful at mitigating water run off and creating lush, adaptive ecosystems to help keep the waters in the ground as climate shifts and summers dry. Beaver impact not only water retention but stream health and salmon habitat. Lets act now for the children of the future and secure this beautiful land we live on. To see land formed and changed by restoration of healthy water ways would be a vote for our future. We need to work with our co species to support common goals of resilience.
