Committee: House Committee On Education

Measure, Appointment or Topic: SB1098

Dear Legislators: I am a former Special Education teacher, who has worked with educators, parents, researchers and activists regarding the sexual exploitation of our children. People that have written books about this, and one who has served as an expert witness regarding pornography and child sex trafficking. We have inappropriate books in our Tillamook Public Library that are pornography and not age appropriate. We have the same issues in our school district. These books are being used to sexualize and groom children/young people who are impressionable and vulnerable to sexual predators, and people promoting this agenda. I want my school board members to be able to stop these books in school curriculum and in our school library. They have no place there. I urge you to vote NO on this. These decisions need to stay in the hands of local school boards. Robin Kostrikin, Pacific City
