SB1098

We have a Federal and State Constitution and a Bill of Rights. You need to go back to these founding documents to research what the Founding Fathers objective was for less government and less laws. We do not need more laws. Our children of yesterday read the Bible in class and learned right from wrong. I doubt that todays 8th grader could read the King James Version. The books that should be in the school library should only pertain to our basic education. The books in a school library have nothing to do with free speech. The books in a school library should pertain to the child's grade level to supplement their learning of the subjects of that grade level. The books you are recommending for a school library have nothing to do with educating that student to grow into a responsible adult. I oppose this Bill.
