

Submitter: Rob Kugler

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: SB685

I write in support of SB 685. Oregonians face increased costs for utilities and we struggle as a state to meet our benchmarks for producing and using clean energy. This bill helps on both fronts: it ensures that utilities must provide public notice if hydrogen is blended into home gas lines; it assigns oversight of this practice by the PUC to protect ratepayers; and it mandates new safety and climate reporting to prevent corporate greenwashing. Please pass this bill.
