

Submitter:	Eric Lee
On Behalf Of:	
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

This bill is only directed to chip away at taking away trapping in Oregon. The “clean water” claim is unreal and completely bogus. Beaver dams are blown out every winter, so any sediment is still blown through. You want cleaner water, stop the pesticides , sewage, harmful chemicals from going into the water in the first place. You took away tools to manage cougars and now there is a major overpopulation and severe issues with depredation on top of severe decline in deer and elk herds. If you take away legal beaver trapping, we will have the same issues. Quit leaning to the lefts emotional bias and go with the science. We have a beaver management plan in place, follow it. We have the wildlife management plans in place by the trained biologist that live this everyday. Let them do their jobs. Stop the ballot box biology!!!
