Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: SB957

Understanding your concern for medical businesses and for providing care for the people of Oregon, I oppose this bill in its present form. It is justifiable that a medical business that has provided education & sign-on bonuses for new hires would want a contract for those employees to stay at their business for a period of time. However, after that the employee should be allowed to make a change of employment that might be the best for their career goals or to benefit their family's needs or even an adjustment that would allow a different schedule to care for elderly parents, etc. If they are even in the same area, it would not decrease the number of that type of medical needs for the residents in the area.
