

Submitter: Andrew Bartoldus

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or Topic: HB3932

I oppose HB 3932. Wildlife management decisions should be made by professionals who are trained to evaluate the consequences and impacts of regulatory changes.

The intention and logic behind this bill is difficult to understand from a scientific perspective. It appears more like an attempt to limit trapping based on personal objections and values. Data and science should inform decision making. This bill does nothing but interfere with the effective management of wildlife in the state.

Sincerely,
Andrew Bartoldus
