On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or Topic: HB3932

Hello,

As a transplant from California and someone who worked within the wildlife sector in California-please do not pass HB 3932a. Stop letting NGOs steer the wheel for what is supposed to be a science-based management agency. I believe based on my experience this will lead to more depredation take of beavers. Worse, the little folks will be left to try and go through drawn out bureaucratic processes to remove beavers. If there are specific locations where researchers would like to see more beavers, work on habitat with those landowners instead of more regulation on our farmers, ranchers and timber producers!
