SB238

Dear Oregon State Senate and house,

Every week I see our rights violated. We have a constitutional right to peacefully protest without harassment, or arrest. When journalists, protestors or other dissenters start getting detained or questioned by our legal system, fascism is here. The current administration is following the Hitler playbook, but at a speedier rate. During these times, dissenters are exposed and have no safe haven. Drones are the stuff of science fiction. Disturbingly enough, it's happening now. The science fiction tropes are becoming reality. I thought I was safer in Oregon, but 100 days into the current administration, the beginning of fascism has arrived here. With the rise of unregulated AI, drones are even a more powerful tool to hunt peaceful dissenters and prosecute them without due process.

Please step up and do something before it's too late.

Respectfully,

A concerned Oregonian
