

Submitter:	M.A. Kruse
On Behalf Of:	ONDA
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

Beavers are incredibly effective at improving water quality. HB 3932 would temporarily close beaver trapping where they are needed most: on rivers and streams that are contending with elevated water temperatures and high levels of sedimentation, toxins or other pollutants.

Beavers are most effective and efficient riparian improvement builders. We need to embrace their capabilities and let them help our river environments.
