

Submitter: Jody Gordon

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or
Topic: HB3932

Beavers are nature's tool for healthy watersheds. Beavers 'work' on streams and rivers hold back water to enhance the growth of native trees which also shades these same streams and rivers to support fish and other animals. Beavers are a vital part of the many animals and plants of water ecosystems. Shouldn't nature's creations be encouraged to do their work and humans stay out of their way?
