HB2977

Increasing tourism taxes to fund other industries is flat out wrong. America was founded on the principle of escaping undue taxation. The fact that legislators want to tax an industry and apply it to anything but tourism is ludicrous. Find a way to allocate the funds you already have to be more efficient.

The lodging industry already pays more than 15% in taxes before we have to pay income tax. The lodging industry will take our voices to stringer measures unless legislators figure out how to allocate their existing money effectively.
