

Submitter:	Ric Ingham
On Behalf Of:	Oregon Natural Desert Association
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

With the Trump administration rolling back clean water protection across the country HB 3932 is Oregon's common sense approach to actually improving water quality across our state. It is a low cost approach to enhance the health of watersheds across our diverse landscape by improving watershed health. Healthier watersheds have a huge impact on not just habitat, but on municipal water quality and supply as well as a reduction in catastrophic wildfires in those watersheds. Please support passage of this important legislation as it has a positive impact on every corner of our state.
