

Submitter: Katherine Wolfe

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or Topic: HB3932

Since beavers have been hunted and removed from their function in their ecosystem in so many places it has become clear that they are a lot better at maintaining the water table, mitigating for drought and in turn helping to prevent extreme wildfires. It's time to let them do what they do better than we do. It's to the benefit of all creatures.
