

Submitter: Bethany Nguyen

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: HB3824

Physical therapists have been trained and qualified to teach users how to use durable medical equipment as well as modify and size per the individual circumstance. This is used widely across many clinical settings and a variety of demographic patients and aside from building the equipment itself, have become the go-to-expert clinicians for education with using equipment to assist in patient's quality of life and safety. Granting this measure would allow for ease of timely ordering equipment for patients which may allow for enhancement of safety for patients.
