Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

Senate Committee on Natural Resources and Wildlife:

I strongly oppose HB 3932 because it is ignoring the use of sound scientific wildlife management in managing beaver populations. If beavers are overpopulated, the excess need to be removed regardless of the type of watershed or whether they are living on private or public land. Both for the health and well-being of the beavers themselves and to prevent excessive damage done by the beavers to renewable resources like the trees they feed on and to the property they destroy by plugging culverts, washing out roads, etc.

Thanks for listening,

Bob Steinmetz
