

Submitter: Mitchell Stargrove

On Behalf Of:

Committee: House Committee On Revenue

Measure, Appointment or Topic: HB2977

Maintaining and enhancing wildlife and healthy ecosystems is good for everyone and strengthens the economic health of the state esp. non-urban areas. People come to Oregon and Oregonians go to the wilderness as a high value activity. Preserve and strengthen our forests, rivers, and local ecosystems. As a physician I regularly prescribe more time in nature -- and evidence back up the medical value of activities in nature.
