Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

HB 3932 proposes closing hunting and trapping of beavers on waterways on public lands deemed impaired by DEQ. Robust scientific evidence shows that beaver dam complexes can address most water quality issues. And they do it for FREE! Beavers are ecosystem engineers. Their activities, such as canal-digging and dam-building, help slow water flow, restore impacted water tables and underground aquifers, create natural wetlands that filter toxins, and simultaneously create wildlife and fish habitats.

Bring Oregon's once lush, vibrant landscape back again with our Beavers! Beavers create habitat for life.
